Comprehensive, Scalable Accessibility Scanning and Monitoring

Automatically evaluate websites, web applications, and digital documents in a single-solution platform.

Allyant's automated scanning and monitoring tools, uniquely available in one single system, enable you to test web content, web-based applications, and digital PDFs in a single scan. And leverage our robust, real-time reporting and expert insights to address issues surfaced by testing results, accelerating your path to compliance.

Our Scanning on Your Timing.

Scan an entire website—including **embedded PDFs**—your most highly trafficked pages, or combinations of both based on the most recent WCAG standards—2.2 AA.

Launch a one-time scan or set them for weekly, monthly, or annually to **monitor the ups and downs of your accessibility score**—and trends that identify the need for training.

Scan in **any environment any time**. Complement scheduled scans with our integrated Chrome Extension for page-level evaluation in pre- and post-production environments.

Dynamic Reporting with Expert Insights.

- **Understand:** High level and drill-down reports group identified issues into three categories—critical, serious, and warning.
- **Prioritize:** We prioritize for you the highest-impact errors that block users and compromise compliance.
- **Fix:** We show you how to fix every identified issue, with code-level guidance and unlimited access to the Allyant Knowledge Base, built upon decades of accessibility expertise.

Uniquely Allyant.

Ours is the only scanning tool on the market that tests web content, web-based applications and embedded PDFs—all in a single scan, all in our single-solution platform.

Get started today.

Start with our comprehensive, automated scanning to immediately evaluate the accessibility of your websites, web applications, and digital documents. And then leverage our suite of software and services to ensure your online content is accessible for every one of every ability, meeting requirements of the ADA, AODA, EAA, HHS, and other global mandates.

Simple. Seamless. Accessibility.
