# Stand-Out Software Features.

### Advanced or Simplified Editing
Choose between a more advanced editor for practitioners, or a simplified, more intuitive tool based on experience and PDF complexity.

### AI-Driven Automated Tagging and Remediation
Accelerate progress with our AI-driven automated tagging feature in the simplified editor, supporting the remediation of tables, lists, forms, and other document elements.

### Manual Tagging Support
Leverage powerful prompts and tooling to more quickly and easily remediate issues that require manual review.

### Fix Wizard
Follow system guidance to quickly and easily fix identified accessibility and structural issues.

### Automated Bookmark Generation
Enhance navigation and usability with automatic bookmark generation—based on structural heading levels.

### Multi-Standards Validation
Ensure documents conform with a selected standard including WCAG, PDF/UA, and HHS to comply with Section 508 and other laws.

### Structural Validation
Validate whether a PDF follows the quality metrics of the ISO 32000-1:2008 standards, ensuring your document can be accessed and viewed properly.

### Comprehensive Reporting
Document adherence to accessibility and compliance with comprehensive reports, detailing checkpoints that must be adhered to in order to meet the applicable standard.

### System of Record
Track the remediation history of documents over time, remove older files, and download accessible PDFs with their corresponding Validation Report.
