High-Volume PDF Accessibility

Generate accessible PDFs in high volume with Allyant's AI-driven automation and proprietary software solutions.

Advancements in AI and automation are accelerating the effectiveness of PDF remediation—especially when it comes to high-volume, templated documents. Allyant's high-volume PDF accessibility solution keeps pace with large quantities—meeting compliance requirements while speeding up production and lowering costs.

Credit card and bank statements

Utility and telecom invoices

Tax forms

Medical bills

Medicaid and Medicare enrollment forms

Healthcare directories and pharmacy formularies

allyant.com

Allyant is Trusted by:

80%
of the largest U.S.
financial institutions

100%
of the largest Canadian
financial institutions

40%
of the largest
telecommunications providers

Integrated and On-Demand.

Leverage Allyant's enterprise software or APIs integrated with your Client Communication Management (CCM) system, Client Relationship Management (CRM) system, database, or proprietary tech stack, producing fully accessible PDFs from your templated design. Build the solution behind your firewall or opt for Allyant to host.

And Allyant can automatically batch produce high quantities of PDFs or enable on-demand access at users' request.

Streamlined and Secure.

Allyant's products and processes adhere to the highest standards of security, integrity, and confidentiality to protect your organization and your customers' information.
