CommonLook Edu
Transforming Accessible Education

Streamline the creation of accessible educational materials—including STEM content—reduce compliance risk, and meet the needs of every learner on time and at scale.

CommonLook Edu, Allyant's easy-to-use accessibility software, gives resource-strapped teams the ability to quickly create accessible learning materials in the format students and staff need—when they need it. Available on any browser, any operating system.

Inspired by decades of accessibility expertise in the education space, CommonLook Edu delivers the industry's most reliable, compliance-aligned outputs for confidence in accuracy and long-term reliability.

CUTTING-EDGE AND CUSTOM-BUILT.

Multiple inputs accepted that include PDF, Word, NIMAS, and ePub, specifically supporting materials most used by educational institutions.

Multiple accessibility formats delivered, including accessible PDF, reflowed large print, e-text, and braille to support the needs of every learner.
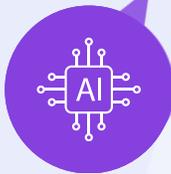

Choice of two editing paths for accessible PDFs to accelerate remediation of simple or complex documents and support users' unique skillsets.

Alternative text generation of math equations, chemistry equations, and diagrams.

Manual tagging tools with guidance to more quickly and easily remediate issues that require manual review.

AI-driven automation to accelerate progress, including tagging STEM content, tables, lists, forms, and more.

System of Record to track the remediation history of documents over time, download accessible documents, and delete older files.

PDF Document Validation Reports to demonstrate adherence to accessibility and compliance requirements, including ADA Title II.

Accessible Educational Materials with Allyant.

CommonLook Edu equips organizations with the software needed to meet key compliance deadlines and quickly deliver accessible educational materials—including STEM content—to every learner in the format they need.

Accessible. Advanced. Anywhere you work.
